

Presentation of SEMIS

Company profile

Founded in 1987, SEMIS is a senegalese research consultancy involved in the **implementation of services** in relation with energy, environment and local development :

- water supply
- electrification
- household energy
- small-scale irrigation.

Our assignments are mostly on location and cover a wide range of **studies, project implementation and project management** :

- demand analysis,
- technical and financial engineering,
- organization and monitoring of water and electricity services in rural areas,
- training and support to the agents of local development

Our capabilities are based on the mobilization of **confirmed national and international expertise**, the use of **powerful software tools** and a **regional standing** through solid external partnerships :

- a team of professionals with proven experience in their respective fields
- software tools: database systems, geographical information systems, analysis of hydraulic and electrical networks
- partnerships with African and European consulting firms: Interconsult (Burkina), Becid (Mauritania), Serohs (Mali), Burgeap (France), Gret (France)

Our offices are in Dakar, but SEMIS' registered office is in Pete, a village in the department of Podor. This symbolic gesture, prompted by its shareholders denotes SEMIS' vocation to contribute to rural development.
